REQUEST FOR RECONSIDERATION

Dear Sir:

Reconsideration of the office action mailed 19 December 2003 is requested. Applicant does appreciate the indication of allowability for claims 3 and 8.

First, applicant is submitting a Supplemental Declaration, and asks that this Declaration replace that originally on file. Further, applicant is submitting formal drawings. Again, it is asked that these drawings replace those as originally filed.

The rejection of claims 1, 4-7 and 9 is contested.

The examiner combines the McDonald, et al. reference with Reighard, et al. The examiner's position seems to be that since McDonald, et al. adds some sounds through its active noise control system, the addition of a horn function had been suggested.

This combination relies on hindsight, and hindsight alone. The McDonald, et al. reference discloses a way of providing engine and engine-related noises to make a "low performance vehicle" sound more like a "high performance vehicle." Thus, the related vehicle noises are those intended to provide the appearance of additional vehicle power. Nothing in McDonald, et al. suggests

providing other functions within the vehicle through the active noise cancellation system. Of course, all active noise cancellation systems are directed to engine noise.

Reighard, et al. adds nothing to the combination. It is not applicant's position that it invented the concept of a vehicle horn. In fact, as Reighard, et al. shows, vehicle horns have typically been stand-alone items.

Nothing in Reighard, et al. would suggest utilizing the active noise control system to provide the horn sound. Reighard, et al. would suggest utilizing a separate horn, as has always been utilized in the prior art.

Thus, reconsideration of the rejection is requested. Allowance of all claims is in order.

Respectfully submitted,

Theodore W. Olds, Reg. No. 33,080
Carlson, Gaskey & Olds
